

# Diabetes Networks Work: Cost efficiency in diabetes prescribing

Sanjay Desai, Associate Director, Medicines Optimisation Team  
*Berkshire West NHS Federated CCGs*

***Diabetes Sans Frontières!***

# Prescribing Targets -old

- LA insulins analogues
- Metformin/SU
- Review pts on biphasic insulin analogues to move to human
- BGM strips
  - formulary adherence
  - Frequency review and template update
  - Aviva formulary adherence
- GLP1 agonist & DPP4 inhibitor
  - HbA1C and weight at initiation
  - % of all new initiations to be for formulary drugs
- Ketone test strips
- PN training

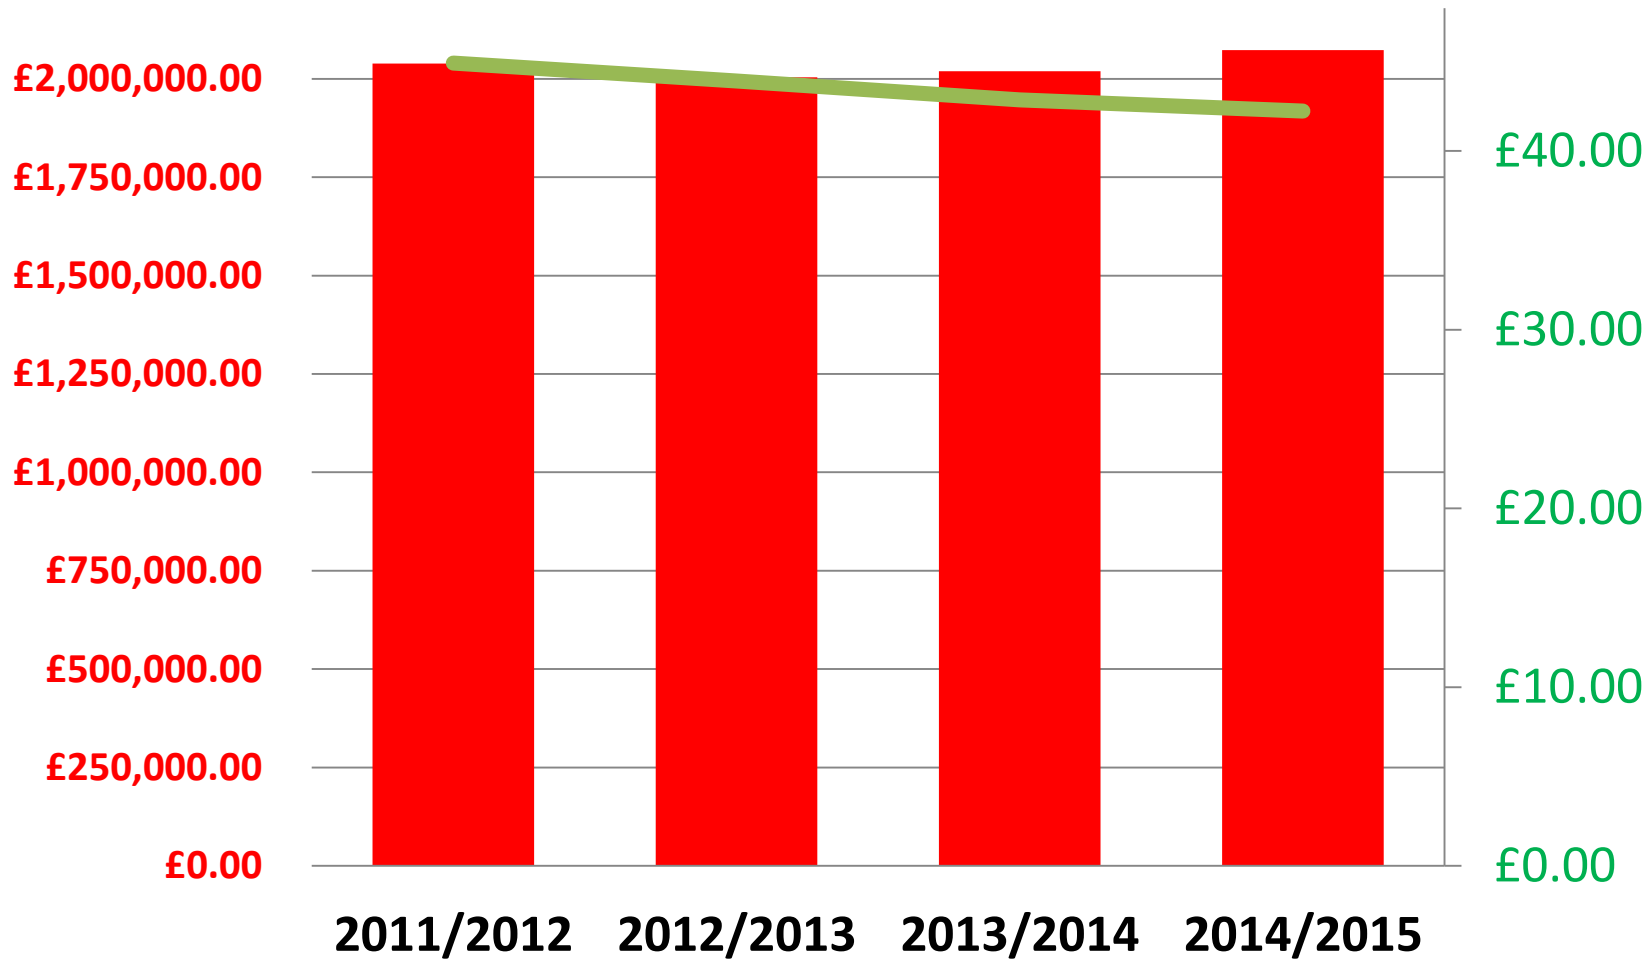

# Prescribing targets 1516

- % newly initiated insulins to be for formulary agents
- % newly initiated GLP-1 agonist and DPP-4 inhibitor to be for formulary agents
- Review of T2D taking metformin with HbA1C >64mmol (8%) to optimise dose to 2g
- % items for BGM test in line with formulary
- % aviva test strips in line with formulary
- % pen needles in line with formulary

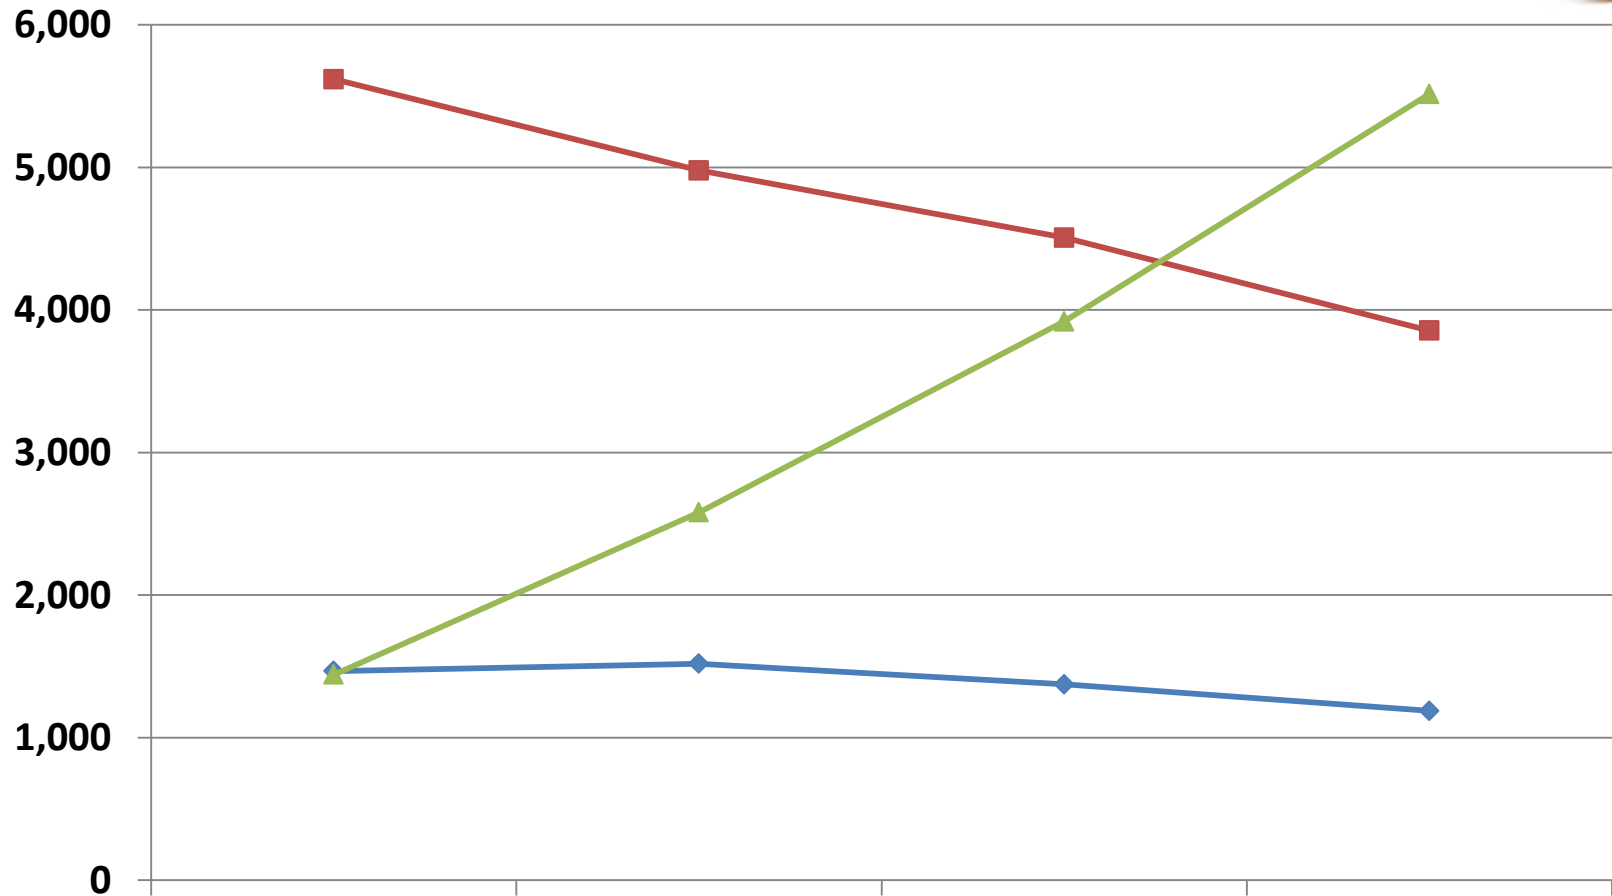

# Insulins cost/item

■ spend — cost/item

# Biphasic insulin analogues items (Intermediate and LA)

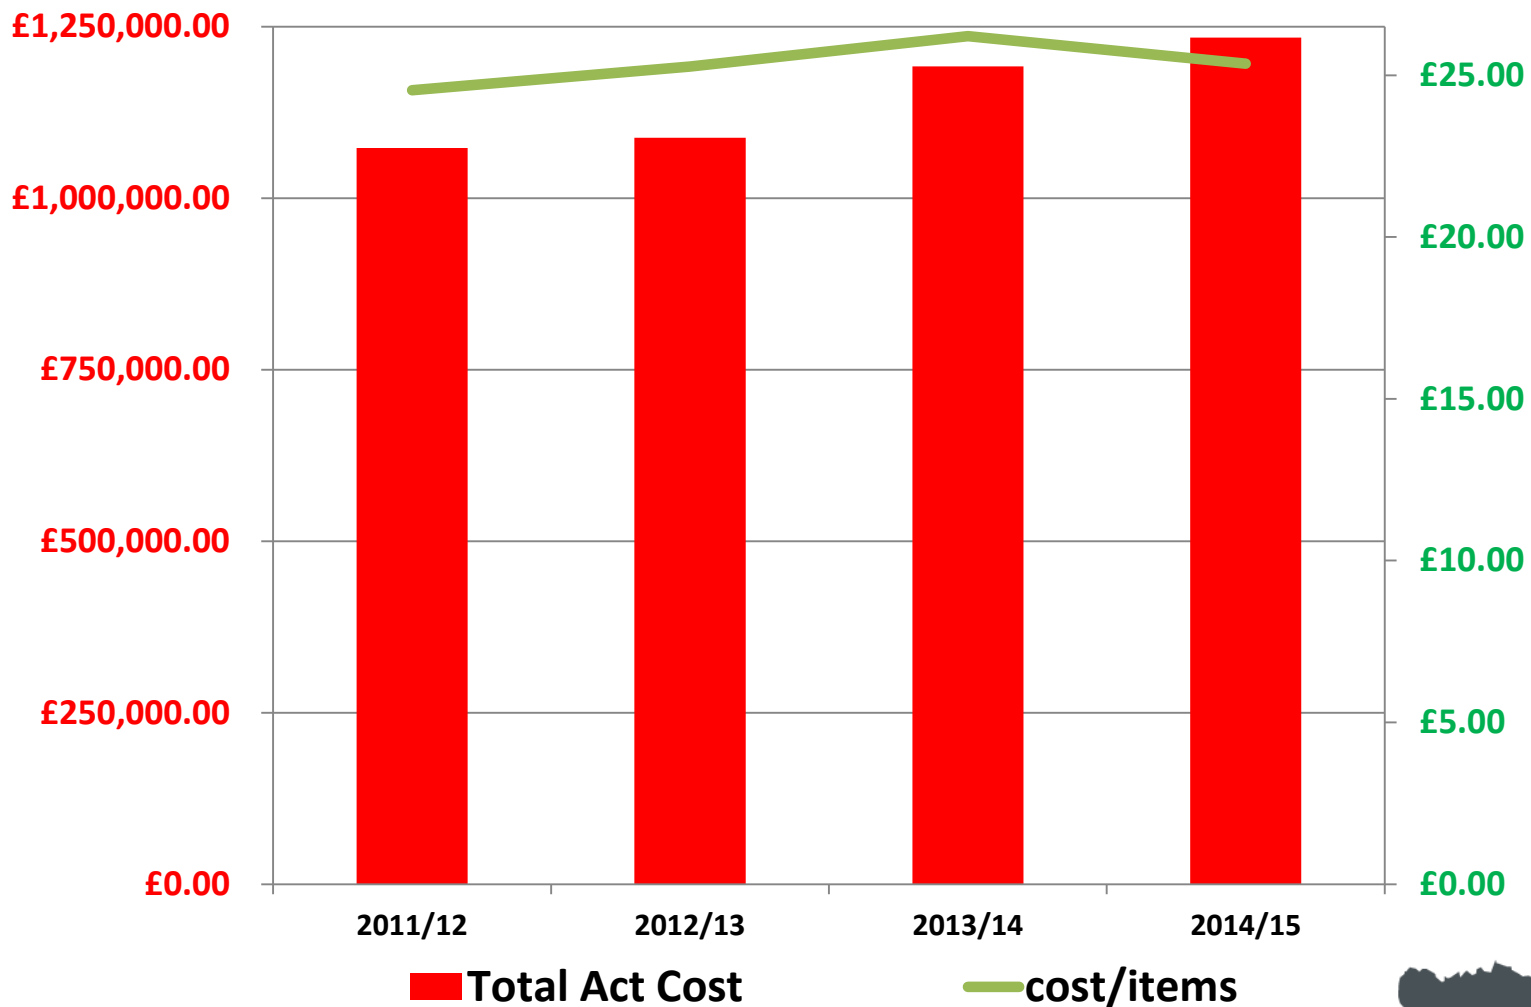

◆ humalog    ■ Novomix    ▲ Humulin M3 and Insuman Comb

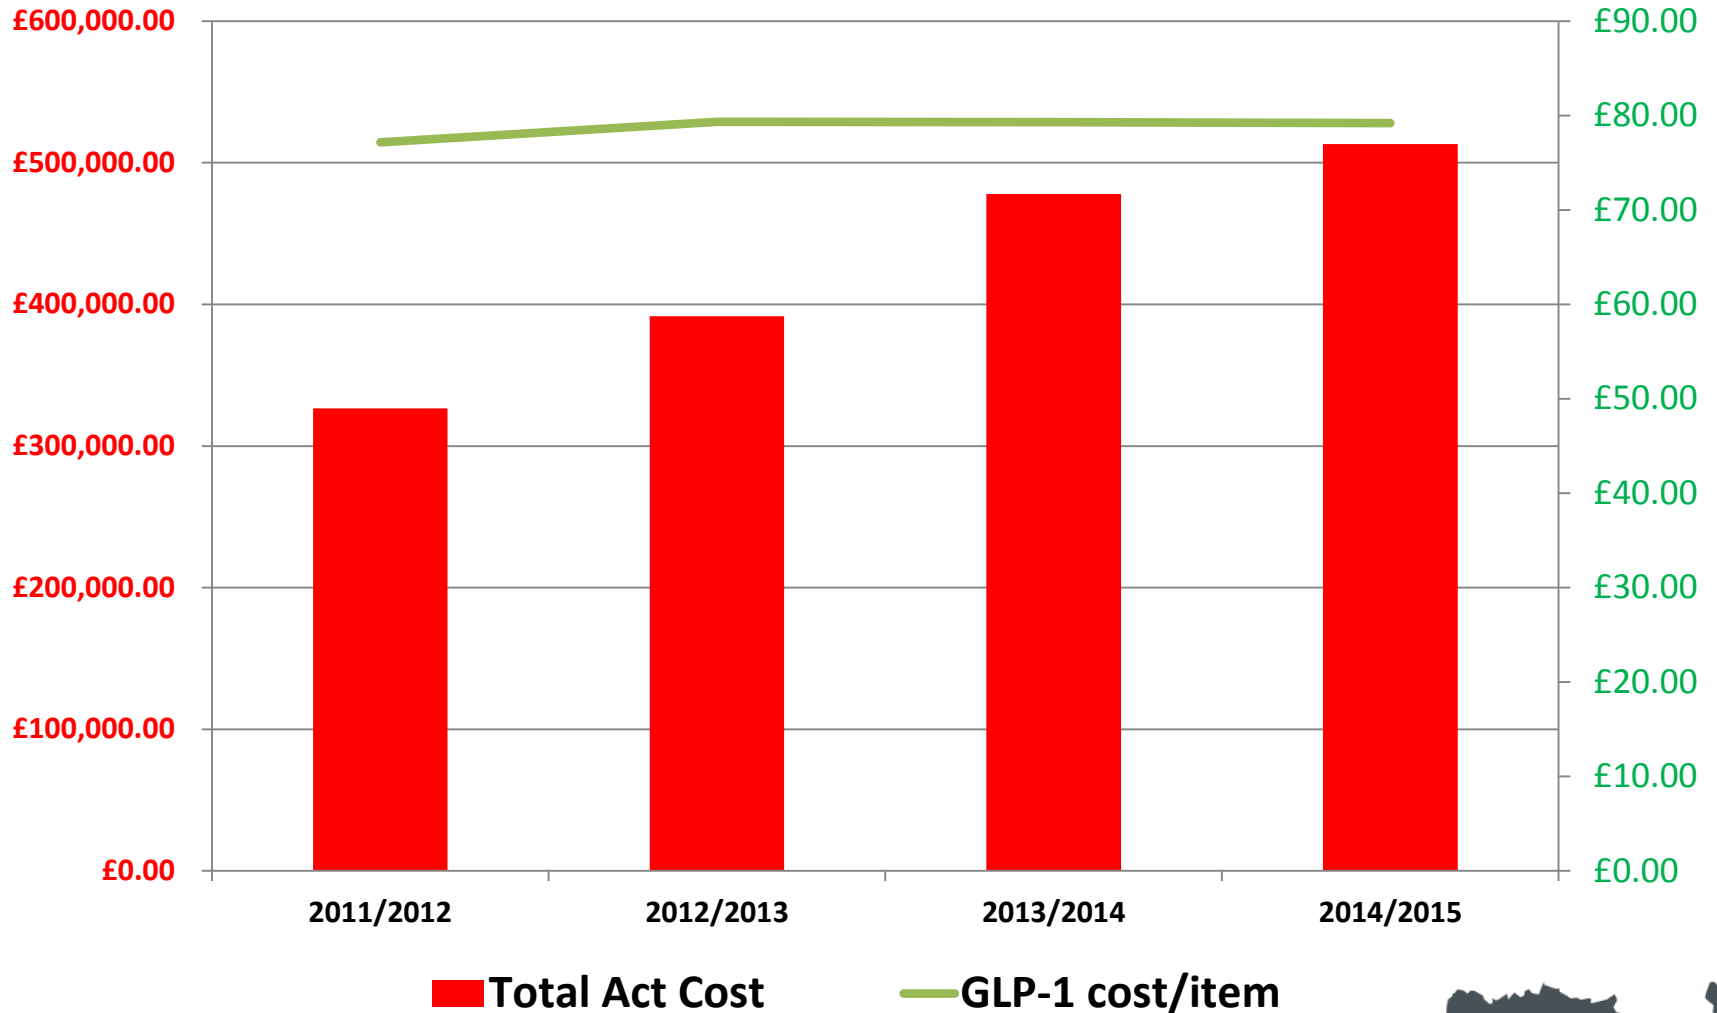

# BGM strips spend & cost/item

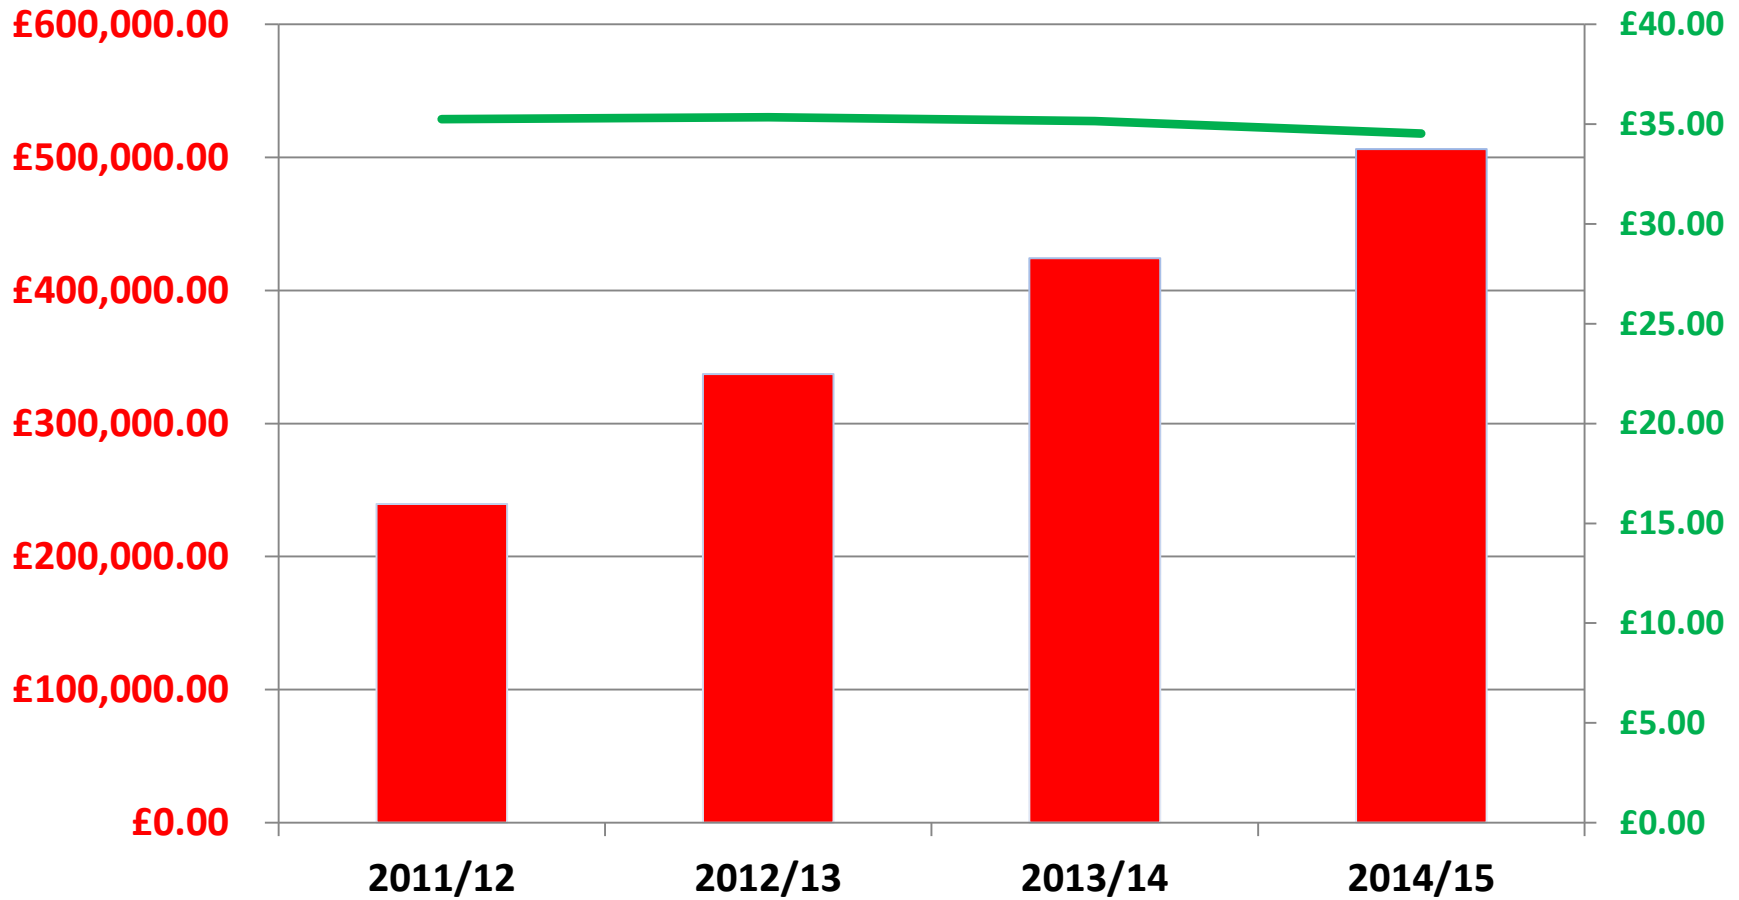

# GLP-1 agonist spend & cost/item

# DPP-4 inhibitor spend & cost/item

■ spend      — cost/item

# In a nutshell...!

- Agreement from all clinicians on any targets

- Not revolutionary. Don't reinvent the wheel

- Working together

# Thank you for listening!

*Any questions?*
