

“Getting to Grips with Population Health” – an afternoon event

Wednesday 28th February – 13.00 – 17.45 (with Networking and Supper),

Holiday Inn Maidenhead, Cox Green, SL6 2RA

Aim: This event is planned to connect leaders from across the region to hear from best practice across the UK on what population health management means in real terms. Taking in elements of infrastructure and data, planning and analysis, whole-system working and harnessing at-scale prevention – we hope to shed light on the multiple aspects required for modern, healthier populations who are appropriately cared for; from birth and early years through to healthy lifestyles, more effective long term condition management and self-care, healthy ageing and a positive end of life.

Agenda
